NOTES:

The Location Summary identifies the center of the smallest ring in the map above. The location data provides various types of identification to better describe the location. The GIS data can be used to map the location in Google maps or Google Earth.

The numbers in the Evangelscape communicate the most compelling reasons why this community needs churches and believers to intercede in missional prayer and activity. This community needs eternal transformation that only comes by way of the gospel and the working of the Holy Spirit.

Churchscape indicators reveal a snapshot of the extent of evangelical presence in the focus community. The last item in this section reveals how many churches are needed in order to have a minimum of one church for every 2000 hhlds (4000-5000 people).

Location Composition: Listed are the total number of people and the total number of households corresponding to each of the three bands indicated on the map on page one.

Cultural bridges are those characteristics that could be used to build relationships with people in the lifestyle group. Various activities, interests, or opinions represented among the consumer behavior characteristics of the lifestyle group offer ways for believers to build relationships with people in the lifestyle group and through that relationship impact them for Christ.

Acts 10:9-10

During the night a vision appeared to Paul: a Macedonian man was standing and pleading with him, "Cross over to Macedonia and help us!" After he had seen the vision, we immediately made efforts to set out for Macedonia, concluding that God had called us to evangelize them.

Top Community Types

Urban Communities

The people are poor, struggling and largely single. Some are single parents with large families. Unemployment is double the national average. For the minority families in Urban Communities, struggling to balance priorities and budgets in a climate of institutional prejudice creates a lack of stability and control. Residing within major metropolitan cities and towns, most households live in apartments. Those who drive choose economy, import, and domestic cars or small trucks. This group finds employment within food and health services, education, retail, and the entertainment industry.

Households: 823
Percent: 40.92%

Upscale Communities

As the wealthiest households in the nation, upscale communities boast high household incomes, significant home values and top educational achievements. Households in these exclusive suburban neighborhoods are headed by predominantly white, college educated, Baby Boomer parents. Most work as executives and white collar professionals. They are active members of the community in business clubs, environmental groups and the arts. For upscale community households, disposable income is at a peak. These families enjoy large homes, comfortable lifestyles and shopping for the latest high-tech electronics.

Households: 541
Percent: 26.9%

Mainstay Communities

The backbone of small towns and second cities, Mainstay Communities are established neighborhoods where residents enjoy strong relational ties. These moderately educated wage earners are employed in well-paying blue collar and professional service jobs. The aging adult population consists of retired American singles and couples. A sense of belonging within the community is a key identity factor for those who live there. Outside the nation's larger metro areas, residents can savor the familiarity of the small town cafe, or venture into the city to frequent comedy clubs, nightclubs and malls.

Households: 431

Top Lifestyle Segments

Latino Nuevo

(68% Unreached)

In Latino Nuevo, the American Dream lives in young, recent immigrants looking for better lives. Concentrated in the barrios of border states as Texas and California, the populace is more than 90 percent Hispanic and more than three-quarters of adults are under the age of 45. These households are filled with child-rearing families-no cluster contains more large families-and they tend to live in old apartments and low valued homes.

Households: 581
Percent: 28.89%

Suburban Optimists

(69% Unreached)

With its concentration of Asian, Hawaiian and white residents, Suburban Optimists presents a portrait of middle-class diversity. Most of the households contain middle-aged couples and families living in older suburban homes, duplexes and apartments located in coastal states and Hawaii. There's an even distribution of residents who have graduated from high school or completed some college, resulting in both blue-collar and white-collar jobs.

Households: 405
Percent: 20.14%

Urban Diversity

(72% Unreached)

With nearly half of households containing minorities, Urban Diversity is known as a transient world of young, multi-ethnic singles and single-parent families. In these inter-city neighborhoods, residents struggle against challenging economics in a mix of rowhouses and high-rise apartment buildings. Most adults have completed high school or some college, with many working at entry-level jobs in retail, health care and food services.

Households: 212
